Panasonic's Revolutionary Stand-alone Air Purification System

Purify Your Air
With or Without Cooling / Heating

7 Reasons to use nanoeTMX

Active Deodourisation
Penetrating into the deepest parts of fibres, nanoeTMX eliminates frequently encountered odours, creating cleaner and fresher spaces.

Hydrates and Moisturises
nanoeTMX combines with natural sebum (natural skin oils) to coat the skin, leading to a smoother, well-hydrated complexion.

Breakdown of Hazardous Substances
nanoeTMX has been confirmed to inhibit and breakdown common hazardous/harmful substances ensuring that the air you breathe is cleaner and safer.

Inhibition of Mould
Common airborne and adhered mould found inside living/working spaces are enveloped and inhibited by nanoeTMX.

Inhibition of Bacteria & Viruses
nanoeTMX envelops and inhibits the activity of airborne and adhered Bacteria & Viruses.

Inhibition of Pollen
nanoeTMX is effective in inhibiting a variety of pollens globally, all year around.

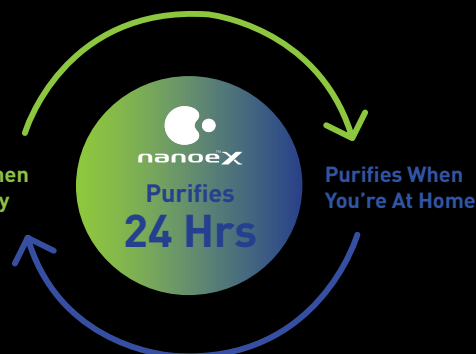

Inhibition of major Allergens
nanoeTMX inhibits allergens such as pet dander, mite faeces / carcasses, and airborne mould, as well as other major allergens.

Complete Air Purification wherever you are

Keep nanoeTMX mode running while you're away, or simply use the Panasonic Comfort Cloud App to return to a fresh smelling home every time.

**Purifies When
You're Away**

**Purifies When
You're At Home**

Ensure the air that you breathe is cleaner and safer by keeping nanoeTMX mode running 24 hrs. With a low energy consumption of 35W/hr for a single unit, Panasonic delivers non-stop Quality Air.
